T-220

When we are talking about prestige...

In keeping with our determination to provide our clients with the most modern developments and advanced technology, we have developed our new luxury series of boats, a new generation, the Master series. With tubes executed in the "Italian style", the Master series is a new innovation for Adventure; the technical merits, workmanship and design have exceeded our already high expectations.

Standard Features

- Welded inflatable buoyancy tube of classic design, with three hermetically-separated chambers
- Inflatable keel providing correct "V" shape in hull
- Continuous 12 mm-thick marine-ply floor
- Precision anodised-aluminium extruded sections enabling perfect jointing of floor sections
- Extremely rugged integral transom for outboard motor with fitted plastic plate for mounting motor
- Professional English valves "Leaffield", 4 Pcs.
- Full outboard protection guards against scuffing, and keeps inside of boat dry
- Drain plug in transom
- Safety grab-ropes on tubes
- Handle in nose also serves as towing ring
- Twin towing rings
- Four rear moulded handles for lifting boat (two for M-360)
- Three removable marine-ply seats, 20 mm thick, with positive, safe location (two for M-360)
- Two oars with rowlocks, and twin tube-mounted oar supports
- Detachable accessories bag to install in boat's nose
- Superb carrying and storage bag; (secondary bag for seats and floorboards fits inside main bag)
- Professional foot pump with valve adaptor
- Emergency repair kit in plastic container, including material and adhesive
- Operation manual

Optional Features

- Sun and wind-proof cabin-style cover providing protection for occupants against inclement weather
- Transportation cover
- Accessories bag with soft seat cover, locating on either of boat's seats

Material used: Valmex 1000 g/m2, manufactured in Germany

Floor type: Rigid continuous floor of marine ply, located between precision aluminium extrusions
